

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

### To Our Patrons.

---

If sufficient support is given to this edition of the "Directory," it is our purpose to issue an annual supplement giving additional names, corrections, etc., and when the present edition is exhausted, a new and more complete one will be published. To assist in this, kindly advise us of any errors that may be noticed, and also the names and addresses of persons interested in Entomology not already given herein, together with any suggestions in the way of improvement.

## PREFACE.

---

For some time past the need of a Directory of persons interested in the study of Entomology has been keenly felt, and several years ago its preparation was begun; but for various reasons was temporarily abandoned. The present volume represents an immense amount of work and considerable expense, as every effort has been made to communicate with entomologists and students in this country and Canada to secure absolutely correct data. Many of our circulars have received no attention, but as the majority of these thus treated represent people who take little, if any, interest in the subject, the omission of their names cannot be greatly regretted.

As inquiries are constantly made for publications on entomological subjects, a list of such papers as can be supplied by the Society—only, of course, so long as copies are in stock—is given on page 68, together with the prices.

It is hoped that this volume will stimulate a renewed interest in Entomology, and create a more fraternal feeling among those engaged in the study. It should prove of great value to those wishing to exchange specimens, and those desirous of obtaining information from the various parts of the country. It is to be hoped that entomologists and others interested will recognize its value, and if the proper support is given, a supplement containing changes of address, new names, etc., and any other information of value, will be published at least annually, and for this purpose we will thank our readers for any additional data they can supply towards a more complete edition.

# THE AMERICAN ENTOMOLOGICAL SOCIETY

## AND THE

### ENTOMOLOGICAL SECTION

#### OF THE ACADEMY OF NATURAL SCIENCES

#### OF PHILADELPHIA.

---

On February 14, 1859, Ezra T. Cresson, James Ridings and George Newman issued a call for the organization of an entomological society. February 22, 1859, the Society was organized with the following members: Dr. Thomas B. Wilson, Dr. John L. LeConte, James Ridings, George Newman, T. B. Ashton, J. W. McAllister, E. T. Cresson, Henry Feldman, George Hill, Charles Wilt, John Pearsall, William Evett, J. H. B. Bland, John Meichel, Robert Jack, W. S. Wood, Thomas Cox, William Wolter, Chas. J. Wood, Louis Schneider and S. H. Shinn.

The first officers were John L. LeConte, *President*; James Ridings, *Vice-President*; E. T. Cresson, *Secretary*; Charles Wilt, *Treasurer*. The first new member elected was Henry Ulke, and the first correspondent was Baron R. Osten Sacken.

The name at this time was "The Entomological Society of Philadelphia," and the Society was incorporated under this title, according to the laws of the State of Pennsylvania, April 11, 1862. February 23, 1867, the name was changed to that of "The American Entomological Society."

On the 17th of December, 1875, the Society entered into an agreement with The Academy of Natural Sciences of Philadelphia by which it occupied quarters in the Academy. In 1895 this agreement was modified, and as modified is in force at the present time. Under its terms no person shall be eligible for membership in this Society who is not already a member of The Academy of Natural Sciences of Philadelphia. The initiation fee of the Academy is ten dollars and the annual dues ten dollars.

The Entomological Section of the Academy is a distinct organization from The American Entomological Society, and was organized May 12, 1876, with the following officers: *Director*, John L. LeConte, M. D.; *Vice-Director*, George H. Horn, M. D.; *Recorder*, James H. Ridings; *Treasurer*, E. T. Cresson; *Secretary*, Charles A. Blake; *Conservator*, James Ridings. The dues to the Entomological Section of the Academy are two dollars per annum. Associates may be elected to the Section. They have all the privileges of members, except that of voting. The dues for Associates are one dollar a year.

These data in regard to the relations between The Academy of Natural

Sciences of Philadelphia, The American Entomological Society and The Entomological Section of the Academy are in reply to numerous queries for information in regard to the terms of membership in the individual societies. It will be noted that there are no dues for The American Entomological Society, but one must be a member of the Academy and pay its dues before being eligible.

The present officers of The American Entomological Society are: *President*, Philip P. Calvert, Ph. D.; *Vice-President*, H. W. Wenzel; *Treasurer*, Ezra T. Cresson; *Recording Secretary*, Henry Skinner, M. D.; *Corresponding Secretary*, W. J. Fox; *Curator*, Henry Skinner, M. D.; *Librarian*, W. J. Fox; *Publication Committee*, Ezra T. Cresson, C. Few Seiss and B. H. Smith; *Executive Committee*, Philip Laurent, Chas. Liebeck and H. W. Wenzel; *Finance Committee*, James W. McAllister, C. S. Welles and C. C. Cresson.

The present officers of The Entomological Section of The Academy of Natural Sciences of Philadelphia are: *Director*, Philip Laurent; *Vice-Director*, H. W. Wenzel; *Treasurer*, Ezra T. Cresson; *Conservator*, Henry Skinner, M. D.; *Recorder*, Henry Skinner, M. D.; *Secretary*, Wm. J. Fox; *Publication Committee*, C. W. Johnson and J. H. Ridings.

The library of The American Entomological Society contains (October, 1898) 2864 volumes, including 111 volumes of pamphlets averaging fifteen titles to a volume. The various departments are represented as follows: Journals, 1436; Coleoptera, 389; General Entomology, 341; Lepidoptera, 214; Economic Entomology, 122; Hymenoptera, 101; Diptera, 86; Hemiptera, 49; Orthoptera, 40; Neuroptera, 25; Miscellaneous, 61. This represents an increase of nearly 100 per cent since 1888, when the total number of volumes was 1445. In the library of The Academy of Natural Sciences of Philadelphia there are 1221 volumes, exclusive of journals, and 1188 pamphlets, devoted entirely to Entomology. The pamphlets form 77 additional volumes. While the works of our library are partially duplicated by the other, it is safe to say that the foremost collection of Entomological works in America is to be found in the building of The Academy of Natural Sciences of Philadelphia, where both libraries are situated.

The collections of insects are large and valuable; they contain many type specimens and represent the labor of a number of the older workers in this branch of natural science. In the Hymenoptera will be found almost all the types of Mr. E. T. Cresson and many of those of Mr. W. J. Fox and other systematists in this order. The valuable collection of Coleoptera was supplemented by the large amount of material collected by the late Charles Wilt. Bland's types are also in this collection. The Horn collection, bequeathed by the late Dr. George H. Horn, represents his life work and contains practically all his types. At the time of his death he was the leader in this branch of entomology in America. It is safe to say that the finest collection of Odonata in America is also here and represents the large amount of work done in this order by Dr. P. P.

Calvert. The collection of Lepidoptera is very large and contains many of the types of Grote, as well as some of those of Blake, Mengel, Skinner and others. In the collection of Diptera are many types of the older writers, as well as the later ones. There are also valuable collections of the other orders. The magnificent collection of exotic Lepidoptera made by the late I. C. Martindale, and now the property of the Academy, is also here. The large collection of exotic Coleoptera has lately been greatly augmented by the material purchased from the heirs of the late Dr. H. G. Griffith.

Students of Entomology are always cordially welcome to visit the Academy and consult our libraries and collections, and we will gladly furnish any information in our power to aid beginners and others.

ENTOMOLOGICAL NEWS, published by the joint Publication Committees of The American Entomological Society and The Entomological Section of The Academy of Natural Sciences of Philadelphia, is an illustrated monthly magazine devoted to the study of insect life. It contains a resumé of the literature of the world treating of American insects, and also articles by the leading Entomologists of the United States and Canada. There is a department devoted to Economic Entomology, edited by Prof. John B. Smith, Sc.D.; a free Exchange Column and a department for the identification of insects for subscribers. In this Journal will be found valuable information for the beginner, the collector, the economic entomologist and the systematist; Volume XI is now publishing. The subscription price is One Dollar a year in advance. Sample copies 12 cents.

The Academy of Natural Sciences of Philadelphia is situated at the S. W. Corner of 19th and Race Sts. (Logan Square), Philadelphia, Pa.

# ENTOMOLOGICAL PUBLICATIONS.

To aid the student in the selection of papers on Coleoptera, Hymenoptera and Lepidoptera, the following index is given:—"gen." (genera), or "sp." (species) after a name indicates that keys or tables of characters are given in the papers, whereby the genera or species can be easily identified. The same may be said of "Monog." (Monograph), "Synop." (Synopsis), "Revis." (Revision), etc., where keys or tables of genera and species are also to be found in the papers so indicated.
